OPTIMIZE YOUR REVENUE CYCLE

Approximately 80 percent of healthcare industry leaders, in a new Black Book survey, said they were considering professional services for full revenue cycle management by 2019 – a worthwhile move in our opinion. This change is driven, in part, by the constant changes in healthcare regulation and technology.

Today, to effectively manage your revenue cycle, you need the services of a technologically adept organization, skilled in the practice of medical billing and committed to keeping you agile and up to date with the ever-changing healthcare regulations. That's us!

As a leading US-based billing company, Optimal RCMS, is strategically positioned to offer a premium full cycle revenue management service to medical groups, surgical centers and medical service providers.

We are masters at navigating the internal complexities of health plan Claims, Utilization Management, Contracting, Provider Registration, and Credentialing. Engaging our services means an increase in organizational productivity, increase offering of value-based care initiatives, and an increase in the quality of service rendered to the patients.
